

**A MECHANISM COMPRISING CLOSED-FORM SYSTEM UNITS FOR
TREATMENT OF AGGREGATE MATERIAL AND PRODUCTION METHOD
OF THE SAME**

- 5 An aggregate storing and classifying mechanism for production of asphalt in
plants, comprising a body (2) having plurality of circular sections (6) arranged in
a manner of substantially surrounding the body (2) for storing aggregate
material comprising different gradation levels plurality of foot means (1) holding
said body (2); corridor means (7) and channel means (15) arranged tree
10 branch-like manner in the body (2) for distributing and storing the aggregate in
the body (2) as homogenously; plurality of discharge mouths (4) and discharge
covers (8) for discharging the aggregate material from the body (2) and feeding
the aggregate material to conveyors placed under the body (2) through plurality
of discharging axis.
